ON THE CD

The CD is split into two sections; section 1 (tracks 1-8) is the backing tracks minus lead guitar & vocals, while section 2 (tracks 9-16) is the backing tracks with all guitar parts added, so in addition to the written tab you can hear the rhythm, fills and solos as they should be played!!

Introduction

The TOTAL ACCURACY 'JAM WITH...' series, is a powerful learning tool that will help you extend your stockpile of licks and fills and develop your improvisational skills. The combination of musical notation and guitar tablature in the book together with backing tracks on the CD gives you the opportunity to learn each track note for note and then jam with a professional session band. The track listing reflects some of Carlos Santana's most popular recordings, providing something for guitarists to have fun with and improvise with, as well as something to aspire to.

The first eight tracks on the CD are full length backing tracks recorded minus lead guitar. The remaining tracks feature the backing tracks with the lead guitar parts added. Although many of you will have all the original tracks in your own collection, we have provided them in the package for your reference. The 'JAM WITH...' series allows you to accurately recreate the original, or to use the transcriptions in this book in conjunction with the backing tracks as a basis for your own improvisation. For your benefit we have put definite endings on the backing tracks, rather than fading these out as is the case on some of the original recordings. The accompanying transcriptions correspond to our versions. Remember, experimenting with your own ideas is equally important for developing your own style; most important of all however is that you enjoy JAM with CARLOS SANTANA and HAVE FUN!

Carlos Santana was the pioneer of Afro-Cuban rock and later brought so many styles into his playing that he is now really quite impossible to pigeon-hole. Carlos broke new ground in the '60s and since then has always been at the apex of the San Francisco music scene. Indeed, almost every well known guitarist cites him as a major influence.

Born on the 20th July 1947, Carlos grew up in Tijuana, Mexico, where he was surrounded by traditional Mexican music which he just could not get in to, much to the disappointment of his father, a traditional street violinist. Later, the Santana family moved to San Francisco where he was introduced to rock and blues, especially the guitar styles of B.B. King and Little Richard and this he did get in to! It was here also that Carlos met keyboard player Gregg Rolie and with him formed The Santana Blues Band in 1967 which was soon completed by Tom Frazer (guitar), David Brown (bass) and Rod Harper (drums), but this line-up was to change frequently. In its original incarnation, The Santana Blues Band was a group of equals with Carlos named as band leader only to satisfy a Musicians Union requirement of the time.

With their name shortened to Santana, their reputation grew steadily resulting in them being signed by Columbia Records and recording their debut album *Santana* in 1969, containing *Evil Ways* and *Soul Sacrifice*. The follow-up album, *Abraxus* included the classic *Samba Pa Ti* and the Peter Green penned *Black Magic Woman*. For the first time Afro-Cuban rhythms were made accessible to predominantly white audiences with the medium being Carlos' relaxed and fluid, although when needed incredibly fiery, guitar work.

Their appearance at Woodstock and subsequent inclusion in the triple album gave Santana their major breakthrough as well as being one of the highlights of the festival. After three hit albums with Santana, Carlos released a live duet album with vocalist and drummer Buddy Miles followed by the fourth Santana album *Caravanserai*. This album marked a definite change of style as Gregg Rolie and Neal Schon left to form Journey and Carlos discovered religion through the teachings of Sri Chimnoy and took an additional religious name - Deavadip - meaning *Light Of The Lamp Supreme*.

It was this that brought Carlos together with John McLaughlin, a fellow Sri Chimnoy disciple. Together they recorded *Love, Devotion, Surrender* a duetted instrumental album. The following year after the release of another Santana studio album *Welcome*, and a *Greatest Hits*, Carlos

teamed up with another devotee, Alice Coltrane, to record the instrumental album *Illuminations*. After two more album releases and some high profile concerts with artists such as Bob Dylan, Stephen Stills, The Grateful Dead and Joan Baez, Santana released a cover of The Zombies' *She's Not There* in 1977 and achieved their biggest U.K. hit.

In a small biography such as this, it is impossible to list everything Carlos has recorded. There have been over 30 releases using just the Santana and Carlos Santana names - that does not include the albums he has guested on! Carlos Santana is one of the most prolific artists to have come from the music breeding ground of '60s California. His history reads like a who's who of music - Carlos' guests and band members have included Michael Shrieve, Tom Coster, Graham Lear and Flora Purim. The lists of shows - in stadiums, small venues and even for charities - Live Aid, disaster benefits, prison inmates, would fill a book on their own.

This book contains eight tracks, some written by Carlos and some not, but all done in that instantly recognisable Santana style. Learn and enjoy!

Performance Notes

Black Magic Woman

Taken from the Peter Green classic, this version has a driving Bossa Nova feel. The intro displays Carlos' unique use of sustain and feedback, squeezing the most from each and every note. This is then followed by a staccato melody line, with not too much distortion, ending with a slow 'rake' across the Dmin7 chord and a pause before the solo guitar comes in. This is played using the neck pickup and starts by playing variations on the vocal melody. As this section continues the improvisation becomes more adventurous, adding a few high register notes with phrases from the D blues scale (D,F,G,G#,A,C).

The chord work is very rhythmic, following an almost 12-bar minor blues progression using Dmin7, Amin7 and Gmin7. This pattern is used through all of the verses.

The main guitar solo has a similar theme to the one at the beginning of the track, but plays through the chord progression twice. This time, as well as melodic experimentation, Carlos uses some unusual rhythms in his phrasing. This kind of playing is sometimes referred to as 'playing across the beat'. Once again the D blues/minor pentatonic scale is used, although there are a couple of references to the D natural minor scale (D,E,F,G,A,Bb,C).

The outro is similar to the intro, using the same type of sustained notes. Generally the dynamics or the amount of distortion present in the guitar tone are changed using the guitar's volume control. This track was probably played on a Gibson Les Paul Special through a modified Fender Princeton or Mesa Boogie amplifier.

Samba Pa Ti

This tune is a mellow instrumental with strong melodic content. The guitar's volume control is frequently used to change the tone of the guitar, varying between a searing lead tone and by contrast a barely audible clean tone.

After the initial statement of the melody a short section follows where the guitar is double tracked using occasional harmony notes. At the end of this section the beat picks up with a double time feel and the melody line becomes more experimental. Throughout this track the scale used is G major (G,A,B,C,D,E,F#).

All through this track classic techniques like string bends, unison bends, and open string pull-offs are used. The guitar was probably a Gibson Les Paul Special with the bridge pick-up

selected and the tone control ‘backed off’ a little. Once again, the amplifier was probably a Fender Princeton or Mesa Boogie.

She's Not There

This track is in the key of G minor, introducing some solo guitar fills in the second verse. These are improvised from the G minor pentatonic scale (G,Bb,C,D,F), and continue through to the chorus. The solo kicks in using a raunchy sounding ‘double stop’ lick. The beat picks up a little here and the solo features some fast blues licks with wide string bends, still using the G minor pentatonic scale.

The next solo is played with a shrill sound, through a wah pedal with a short ‘slap back’ echo. The scale once again is the G minor pentatonic, this time with some tremolo arm effects, usually lowering the pitch rather than using it for vibrato. This track was probably played on a Paul Reed Smith guitar through a Mesa Boogie amplifier.

The Healer

This track was recorded with the revered bluesman John Lee Hooker. It begins with a ‘double stop’ riff, just on the edge of distortion, and before long Carlos’ distinctive solo guitar can be heard improvising around the D minor pentatonic scale (D,F,G,A,C), with occasional references to the D natural minor scale (D,E,F,G,A,Bb,C).

Later in the track the soloing becomes more aggressive, using wah effects and fast picking techniques. Having said this the playing is very soulful and dynamic, in keeping with the Latin-American feel. This track was probably played on an early Paul Reed Smith guitar through a Mesa Boogie amplifier.

Oye Como Va

This track opens with a melody based around the A natural minor scale (A,B,C,D,E,F,G). Behind the verse there is some sparse chord work based around the Amin7 and D chords. After the vocal section there is a solo, again based around the A natural minor scale, occasionally using notes from the A blues scale (A,C,D,Eb,E,G). The solo often makes musical references to the D chord by including an F# which is not in the previously mentioned scales, but is contained in the D chord.

After the final vocal section there is a short solo in a similar style to the first, using repeated melodic themes, playing closely along with the rhythm of the backing musicians. Once again this track was probably played on a Gibson Les Paul Special through a modified Fender Princeton or Mesa Boogie amplifier.

Europa

This atmospheric instrumental features Carlos’ searing lead sound, treated with reverb and a short delay. The first solo section is very melodic, using the C natural minor scale (C,D,Eb,F,G,Ab,Bb). Sometimes there is a pentatonic feel about the solo, especially during the last phrase of the first section, but this is not surprising as the C minor pentatonic scale (C,Eb,F,G,Bb) is contained wholly within the C natural minor scale.

The next section is played with a clean sound, through a vibrato or fast chorus effect. This section uses mainly the C minor pentatonic scale. The distorted guitar takes over once again here in a similar vein to the first section, and the feel becomes slightly more brisk. During this outro section the guitar’s volume control is used to change the dynamics of the sound; turning down for less distorted parts and up for maximum sustain. This track was most likely played on a Yamaha SG through a Mesa Boogie amplifier.

Evil Ways

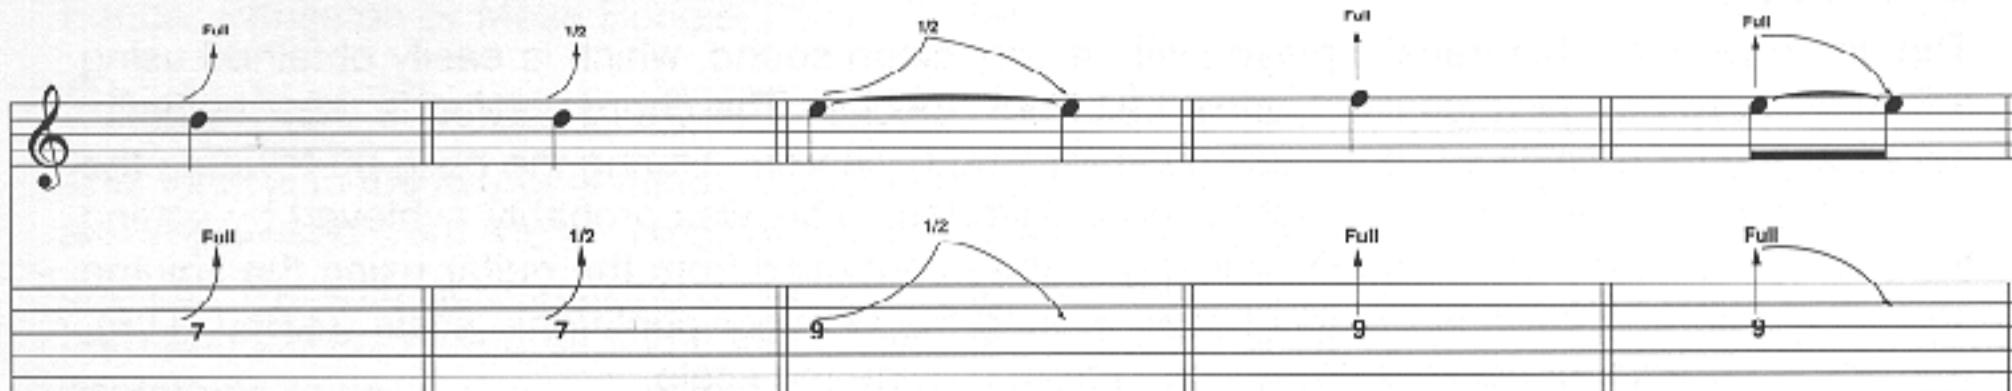

The chord work on this track is played with a very clean sound, which is easily obtained using a P90 or 'soap bar' pickups like Carlos' Les Paul Special. The chord playing is very rhythmic, based around a repetitive groove using Gmin7 and C chords. During the build up towards the solo the guitar's tone becomes slightly more distorted. This was probably achieved by setting the amplifier to a distorted sound, which was then controlled from the guitar using the volume pot. The solo and outro is roughly based around the G minor pentatonic scale (G,Bb,C,D,F), with some occasional passing notes added from outside the scale.

Persuasion

This track is in the key of F minor, an unusual choice for a guitar based band. There is also a recurring modulation to Ab minor which gives a 'dark' overall feel. The sound of the guitar is slightly distorted, but the strength of picking attack varies this throughout the song. The picking and strumming styles are very busy using lots of muted strokes.

The solo appears at the end of the track once again. It is played using mostly the F blues scale (F,Ab,Bb,B^{flat},C,Eb). After the beginning section of the solo a 'question and answer' phrasing section begins between the lead guitar and the rhythm section. The guitar continues to play the F blues scale even when the backing chord is Ab minor, this creates a distinctly moody sound.

Notation & Tablature explained

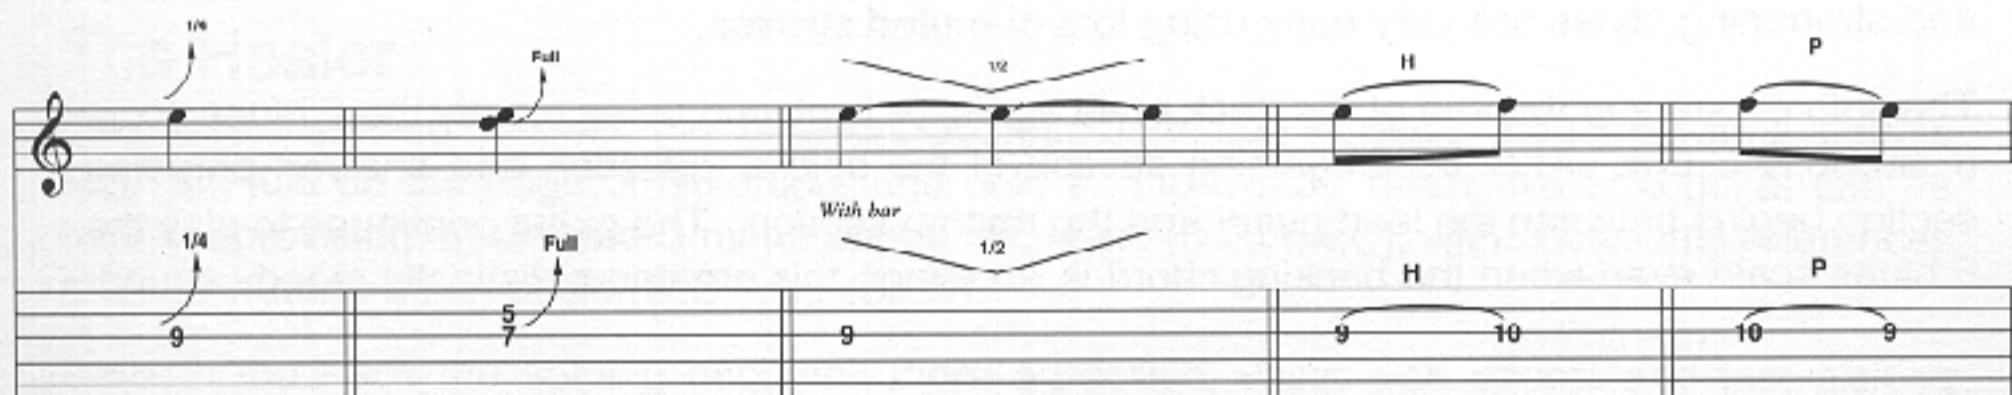

BEND: Strike the note and bend up a whole step (two frets)

BEND: Strike the note and bend up a half step (one fret)

BEND AND RELEASE: Strike the note, bend up a half step, then release the bend.

PRE-BEND: Bend the note up, then strike it

PRE-BEND AND RELEASE: Bend up, strike the note, then release it

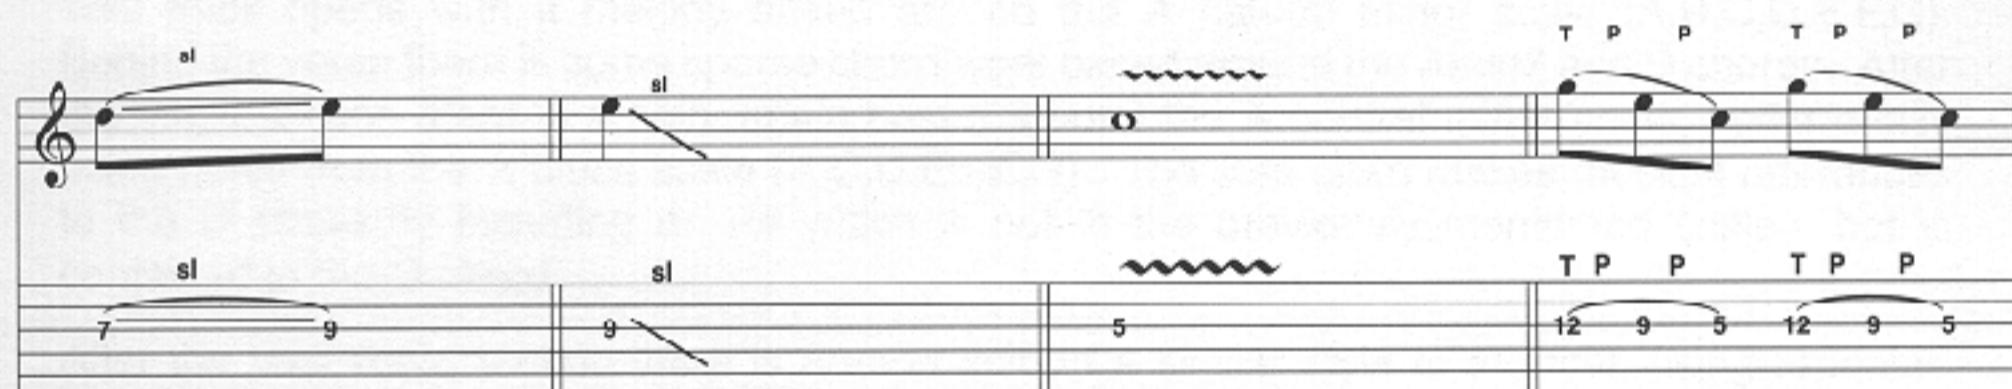

QUARTER-TONE BEND: Bend the note slightly sharp

UNISON BEND: Strike both notes, then bend the lower note up to the pitch of the higher one

TREMOLO BAR BENDS: Strike the note, and push the bar down and up by the amounts indicated

HAMMER-ON: Strike the first note, then sound the second by fretting it without picking

PULL-OFF: Strike the higher note, then pull the finger off while keeping the lower one fretted

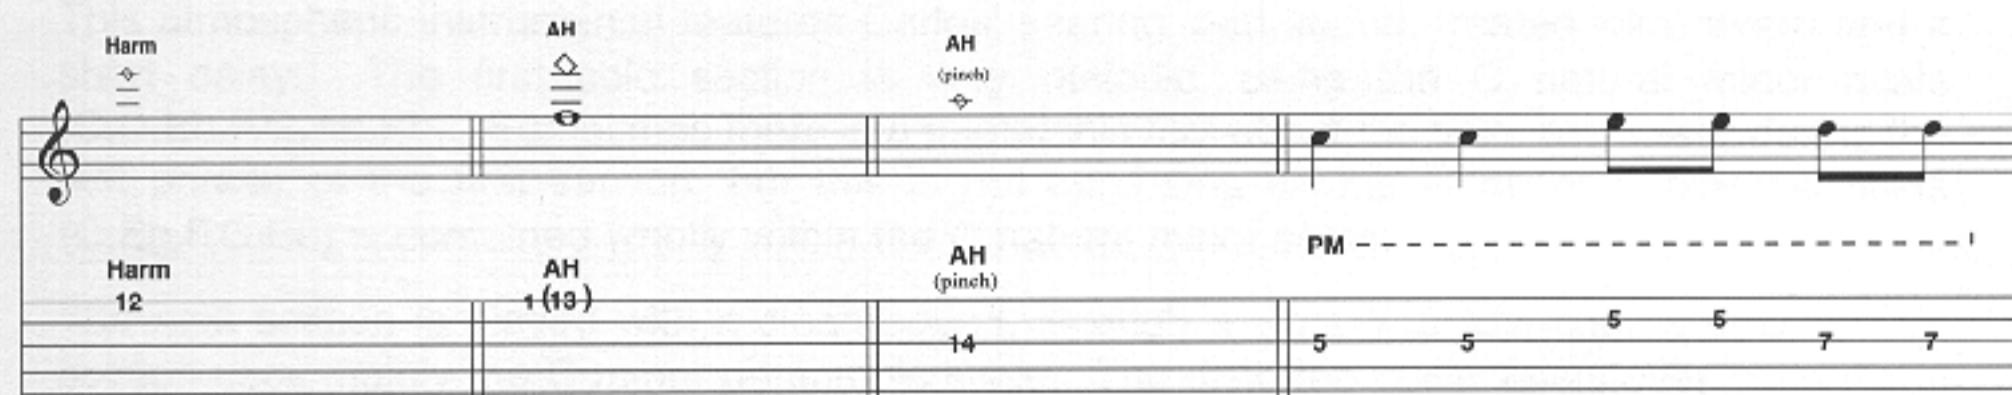

SLIDE: Slide the finger from the first note to the second. Only the first note is struck

SLIDE: Slide to the fret from a few frets below or above

VIBRATO: The string is vibrated by rapidly bending and releasing a note with the fretboard hand or tremolo bar

TAPPING: Hammer on to the note marked with a T using the picking hand, then pull off to the next note, following the hammer-ons or pull-offs in the normal way

NATURAL HARMONIC: Lightly touch the string directly over the fret shown, then strike the note to create a "chiming" effect

ARTIFICIAL HARMONIC: Fret the note, then use the picking hand finger to touch the string at the position shown in brackets and pluck with another finger

ARTIFICIAL HARMONIC: The harmonic is produced by using the edge of the picking hand thumb to "pinch" the string whilst picking firmly with the plectrum

PALM MUTES: Rest the palm of the picking hand on the strings near the bridge to produce a muted effect. Palm mutes can apply to a single note or a number of notes (shown with a dashed line)

GUITAR SOLO I

36

Musical score and tablature for guitar solo. The score shows a treble clef, a key signature of four flats, and a 4/4 time signature. The tablature shows the E, B, G, D, A, and E strings. Various performance techniques are indicated: "Full" with arrows pointing up, "w/vol." with a wavy line, and "P" with a circled P. Fingerings are shown above the strings.

39

Continuation of the guitar solo. The score and tablature show the progression from measure 36 to measure 39. The tablature includes fingerings and performance instructions like "Full" and "P".

42

Continuation of the guitar solo. The score and tablature show the progression from measure 39 to measure 42. The tablature includes fingerings and performance instructions like "Full" and "P". A note in measure 42 is labeled "(feedback 8th)".

Vocals **Abm** **Fm** **B^b Fm**

Oh, — the spell you put on me is just like thun - der babe.

Guitar

45

Musical score for the bridge section. It features vocal parts in Abm, Fm, and B^b Fm, and a guitar part. The guitar part includes a tablature showing chords and strumming patterns. Fingerings like "4", "6", and "3" are indicated on the strings.

Carlos Santana's instantly recognisable guitar style brought the rhythms of Afro-Cuban music to generations of people who might otherwise never have heard them. His soulful playing has inspired guitarists the world over for the last three decades, and continues to do so today.

This guitar workshop is a powerful learning tool that will help you extend your stockpile of licks and fills and develop your improvisational skills. The combination of musical notation and guitar tablature in this book together with backing tracks on the CD gives you the opportunity to learn eight of Carlos Santana's tracks note for note and then jam with a professional session band. The track listing reflects some of Carlos Santana's most popular recordings, providing something for guitarists to have fun with and improvise with, as well as something to aspire to.

The CD is split into two sections; section 1 (tracks 1-8) is the backing tracks minus lead guitar & vocals, while section 2 (tracks 9-16) is the backing tracks with all guitar parts added, so in addition to the written tab you can hear the rhythm, fills and solos as they should be played!! The 'JAM WITH...' series allows you to accurately recreate the original songs, or to use the transcriptions in this book in conjunction with the backing tracks as a basis for your own improvisation.

Professional Guitar Workshops

"★★★★★... excellent" ... *Guitar World USA*

"invaluable, they can practically guarantee progress" ... *Guitarist Magazine*

"the hottest new guitar tuition package in years" ... *The Guitar Magazine*
